

# AQA Biology AS & A2 Series

## Features

- **Student Workbooks:** Specifically written to meet the requirements of students studying AQA Biology. They use an engaging contextual approach to cover biological principles within each of the AS and A2 units.
- **AS and A2 Model Answers books:** Contain suggested answers to **all** activities.
- **Teacher Resource CD-ROM** contains:
  - Full digital copies of the AS and A2 Student Workbooks and Model Answers books as **non-printable** PDF files.
  - **Crossword puzzles** and **glossary worksheets** to test understanding of biological terms for all topics.
  - Presentation Media **free** sample: **Mutations version 2.0.**
  - Microsoft® Excel® spreadsheets for statistical analysis.

**NOTE:** New editions of each workbook are published in **August** of each alternate year.

Release date: August 2009

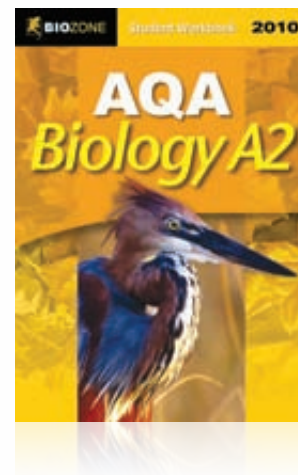

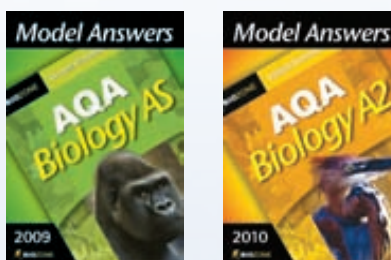

**AQA Biology AS**

- Skills in Biology
- Unit 1: Biology and Disease
  - Macromolecules & Human Digestion
  - Cell Structure and Function
  - Processes Across Exchange Surfaces
  - Gas Exchange at the Lungs
  - The Human Heart
  - Immunology
- Unit 2: The Variety of Living Organisms
  - The Role of DNA
  - Variety and Complexity
  - Biochemical & Cellular Diversity
  - Adaptation and Specialisation
  - Classification & Evidence of Phylogeny
  - Evolution and Biodiversity

Pages: 256

## Model Answers

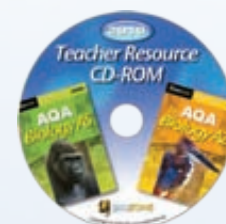

**AQA Biology A2**

- Unit 4: Populations and Environment
  - Investigating Populations
  - The Dynamics of Populations
  - Photosynthesis & Cellular Respiration
  - Energy in Ecosystems
  - Nutrient Cycles
  - Succession in Ecosystems
  - The Genetics of Populations
- Unit 5: Control in Cells and Organisms
  - Response and Coordination
  - Muscles and Movement
  - Homeostasis
  - DNA and Gene Expression
  - Gene Cloning Technologies

Pages: 256

## Teacher Resource CD-ROM

## Ordering information

### AS Student Workbook - 2009

ISBN: 978-1-877462-18-4

Full Price: £16.95  
Discount Price\*: £10.95

### A2 Student Workbook - 2010

ISBN: 978-1-877462-39-9

Full Price: £16.95  
Discount Price\*: £10.95

### AS Model Answers

ISBN: 978-1-877462-19-1 £3.95

### A2 Model Answers

ISBN: 978-1-877462-41-2 £3.95

### Teacher Resource CD-ROM

ISBN: 978-1-877462-42-9 £29.95

\* Discount Price: Available to schools ordering directly from the Biozone sales office. A minimum of 5 books must be ordered to qualify. Ownership of the books must reside with the students.

Note to the Teacher . . . . .	iii
Acknowledgments & Photo Credits . . . . .	iv
How To Use This Workbook . . . . .	1
Activity Pages . . . . .	2
Explanation of Terms . . . . .	3
Resources Information . . . . .	4
Textbook Reference Grid . . . . .	7
Using the Internet . . . . .	8
Using the Teacher Resource CD-ROM . . . . .	10
AQA AS and A2 Biology Course Guide . . . . .	11

## SKILLS IN BIOLOGY

<i>Objectives and Resources</i> . . . . .	12
Terms and Notation . . . . .	14
Hypotheses and Predictions . . . . .	15
Planning an Investigation . . . . .	17
Experimental Method . . . . .	19
Recording Results . . . . .	21
Variables and Data . . . . .	22
Transforming Raw Data . . . . .	23
Data Presentation . . . . .	25
Drawing Bar Graphs . . . . .	26
Drawing Histograms . . . . .	27
Drawing Pie Graphs . . . . .	28
Drawing Kite Graphs . . . . .	29
Drawing Line Graphs . . . . .	30
Interpreting Line and Scatter Graphs . . . . .	33
Drawing Scatter Plots . . . . .	34
Taking the Next Step . . . . .	35
Descriptive Statistics . . . . .	37
Interpreting Sample Variability . . . . .	39
Biological Drawings . . . . .	41
The Structure of a Report . . . . .	43
Writing the Methods . . . . .	44
Writing Your Results . . . . .	45
Writing Your Discussion . . . . .	46
Citing and Listing References . . . . .	47
Report Checklist . . . . .	49

## UNIT 1: BIOLOGY AND DISEASE

Concept Map for Unit 1 . . . . .	50
The Causes of Disease . . . . .	51

## MACROMOLECULES & HUMAN DIGESTION

<i>Objectives and Resources</i> . . . . .	53
Biochemical Tests . . . . .	54
Carbohydrates . . . . .	55
Amino Acids . . . . .	57
Proteins . . . . .	59
Enzymes . . . . .	61
Enzyme Reaction Rates . . . . .	63
Enzyme Cofactors and Inhibitors . . . . .	64
The Human Digestive Tract . . . . .	65
Stomach and Small Intestine . . . . .	67
The Large Intestine . . . . .	69
Absorption and Transport . . . . .	70
The Control of Digestion . . . . .	71

## CELL STRUCTURE AND FUNCTION

<i>Objectives and Resources</i> . . . . .	72
Animal Cells . . . . .	73
Eukaryotic Cell Diversity . . . . .	75
Cell Sizes . . . . .	76
Cell Structure and Organelles . . . . .	77
Prokaryotic Cells . . . . .	79
Optical Microscopes . . . . .	81
Electron Microscopes . . . . .	83
Cell Fractionation . . . . .	85
Identifying Cell Structures . . . . .	86
Identifying Electron Micrographs . . . . .	87

## PROCESSES ACROSS EXCHANGE SURFACES

<i>Objectives and Resources</i> . . . . .	89
Cell Processes . . . . .	90
Lipids . . . . .	91
The Structure of Membranes . . . . .	93
The Role of Membranes in Cells . . . . .	95
Active and Passive Transport . . . . .	97
Diffusion . . . . .	98
Osmosis and Water Potential . . . . .	99
Ion Pumps . . . . .	101
Exocytosis and Endocytosis . . . . .	102
Cholera . . . . .	103

## GAS EXCHANGE AT THE LUNGS

<i>Objectives and Resources</i> . . . . .	104
Introduction to Gas Exchange . . . . .	105
Breathing in Humans . . . . .	106
The Human Respiratory System . . . . .	107
Measuring Lung Function . . . . .	109
Gas Transport in Humans . . . . .	111
Respiratory Diseases . . . . .	113
Diseases Caused by Smoking . . . . .	115
Tuberculosis . . . . .	117

## THE HUMAN HEART

<i>Objectives and Resources</i> . . . . .	118
The Human Heart . . . . .	119
Control of Heart Activity . . . . .	121
The Cardiac Cycle . . . . .	123
Review of the Human Heart . . . . .	124
Exercise and Blood Flow . . . . .	125
Cardiovascular Disease . . . . .	127
The Health Benefits of Exercise . . . . .	129

## IMMUNOLOGY

<i>Objectives and Resources</i> . . . . .	131
Targets for Defence . . . . .	133
Blood Group Antigens . . . . .	134
Blood . . . . .	135
The Body's Defences . . . . .	137
Blood Clotting and Defence . . . . .	139
The Action of Phagocytes . . . . .	140
Inflammation . . . . .	141
Fever . . . . .	142
The Immune System . . . . .	143
Antibodies . . . . .	145
Antigenic Variability in Pathogens . . . . .	147
Acquired Immunity . . . . .	148
Vaccination . . . . .	149
Types of Vaccine . . . . .	151
Monoclonal Antibodies . . . . .	153
Disease and Public Health . . . . .	155

## UNIT 2: THE VARIETY OF LIVING ORGANISMS

Concept Map for Unit 2 . . . . .	157
Variation . . . . .	158

## THE ROLE OF DNA

<i>Objectives and Resources</i> . . . . .	160
The Genome . . . . .	161
Prokaryotic Chromosomes . . . . .	162
Eukaryote Chromosome Structure . . . . .	163
Nucleic Acids . . . . .	165
Creating a DNA Molecule . . . . .	167
DNA Molecules . . . . .	171
The Genetic Code . . . . .	172
The Simplest Case: Genes to Proteins . . . . .	173
Meiosis . . . . .	174
Crossing Over . . . . .	176
Crossing Over Problems . . . . .	177

## VARIETY AND COMPLEXITY

<i>Objectives and Resources</i> . . . . .	178
Genetic Diversity . . . . .	179
The Founder Effect . . . . .	180
Population Bottlenecks . . . . .	181
Genetic Drift . . . . .	182
Selective Breeding in Crop Plants . . . . .	183
Selective Breeding in Animals . . . . .	185

## BIOCHEMICAL & CELLULAR DIVERSITY

<i>Objectives and Resources</i> . . . . .	187
Chloroplasts and Cell Walls . . . . .	188
Haemoglobins . . . . .	189
DNA Replication . . . . .	191
Mitosis and the Cell Cycle . . . . .	193
The Cell Cycle and Cancer . . . . .	195
Differentiation of Human Cells . . . . .	196
Human Cell Specialisation . . . . .	197
Plant Cell Specialisation . . . . .	198
Root Cell Development . . . . .	199
Levels of Organisation . . . . .	200
Animal Tissues . . . . .	201
Plant Tissues . . . . .	202

## ADAPTATION AND SPECIALISATION

<i>Objectives and Resources</i> . . . . .	203
Transport and Exchange Systems . . . . .	204
Surface Area and Volume . . . . .	205
Gas Exchange in Animals . . . . .	207
Gas Exchange in Insects . . . . .	209
Gas Exchange in Freshwater . . . . .	210
Gas Exchange in Fish . . . . .	211
Stomata and Gas Exchange . . . . .	213
Adaptations of Xerophytes . . . . .	215
Mammalian Transport . . . . .	217
Arteries . . . . .	218
Capillaries and Tissue Fluid . . . . .	219
Veins . . . . .	221
Root Structure . . . . .	222
Transpiration . . . . .	223
Uptake in the Root . . . . .	225

## CLASSIFICATION & EVIDENCE OF PHYLOGENY

<i>Objectives and Resources</i> . . . . .	226
The New Tree of Life . . . . .	227
The Species Concept . . . . .	228
Behaviour and Species Recognition . . . . .	229
DNA and Taxonomy . . . . .	230
Classification System . . . . .	231
DNA Hybridisation . . . . .	233
Immunological Studies . . . . .	234
Protein Comparisons . . . . .	235

## EVOLUTION AND BIODIVERSITY

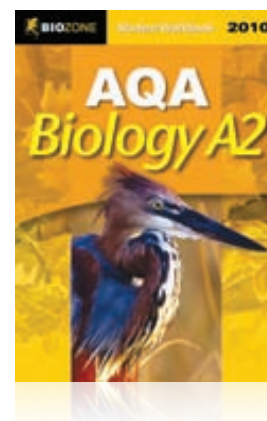

<i>Objectives and Resources</i> . . . . .	236
Antibiotics . . . . .	237
Evolution of Drug Resistance . . . . .	238
The Basis of Resistance . . . . .	239
Global Biodiversity . . . . .	240
Britain's Biodiversity . . . . .	241
Loss of Biodiversity . . . . .	243
Tropical Deforestation . . . . .	244
Agriculture and Diversity . . . . .	245
Measuring Diversity . . . . .	247

INDEX . . . . .	249
-----------------	-----

# AQA Biology A2 - Contents

Note to the Teacher . . . . .	iii
Acknowledgments & Photo Credits . . . . .	iv
How To Use This Workbook . . . . .	1
Activity Pages . . . . .	2
Explanation of Terms . . . . .	3
Resources Information . . . . .	4
Textbook Reference Grid . . . . .	7
Using the Internet . . . . .	8
Using the Teacher Resource CD-ROM . . . . .	10
AQA AS and A2 Biology Course Guide . . . . .	11

## UNIT 4: POPULATIONS AND ENVIRONMENT

Concept Map for Unit 4 . . . . . 12

### INVESTIGATING POPULATIONS

<i>Objectives and Resources</i> . . . . .	13
Components of an Ecosystem . . . . .	14
Habitat . . . . .	15
Ecological Niche . . . . .	16
Adaptations to Niche . . . . .	17
Sampling Populations . . . . .	19
Quadrat Sampling . . . . .	21
Quadrat-Based Estimates . . . . .	22
Sampling a Leaf Litter Population . . . . .	23
Transect Sampling . . . . .	25
Mark and Recapture Sampling . . . . .	27
Designing your Field Study . . . . .	29

### THE DYNAMICS OF POPULATIONS

<i>Objectives and Resources</i> . . . . .	31
Features of Populations . . . . .	32
Density and Distribution . . . . .	33
Population Regulation . . . . .	34
Population Growth . . . . .	35
Population Growth Curves . . . . .	36
Species Interactions . . . . .	37
Intraspecific Competition . . . . .	39
Interspecific Competition . . . . .	41
Niche Differentiation . . . . .	43
Predator-Prey Strategies . . . . .	44
Predator-Prey Interactions . . . . .	45
Population Age Structure . . . . .	46
World Population Growth . . . . .	47
Survival Rates and Life Expectancy . . . . .	49
Human Demographics . . . . .	50

### PHOTOSYNTHESIS & CELLULAR RESPIRATION

<i>Objectives and Resources</i> . . . . .	51
ATP in Metabolism . . . . .	52
The Role of ATP in Cells . . . . .	53
Plants as Producers . . . . .	54
Photosynthesis . . . . .	55
Pigments and Light Absorption . . . . .	56
The Biochemistry of Photosynthesis . . . . .	57
Factors affecting Photosynthesis . . . . .	59
Cellular Respiration . . . . .	60
The Biochemistry of Respiration . . . . .	61
Anaerobic Pathways . . . . .	63

### ENERGY IN ECOSYSTEMS

<i>Objectives and Resources</i> . . . . .	64
Energy Inputs and Outputs . . . . .	65
Food Chains . . . . .	66
Constructing a Food Web . . . . .	67
Energy Flow in an Ecosystem . . . . .	69
Ecological Pyramids . . . . .	71
Production and Trophic Efficiency . . . . .	73
Increasing Agricultural Productivity . . . . .	75
Options for Pest Control . . . . .	77

### NUTRIENT CYCLES

<i>Objectives and Resources</i> . . . . .	79
Nutrient Cycles . . . . .	80
The Nitrogen Cycle . . . . .	81
Nitrogen Pollution . . . . .	83
The Carbon Cycle . . . . .	85
Global Warming . . . . .	87
The Effects of Global Warming . . . . .	89

### SUCCESSION IN ECOSYSTEMS

<i>Objectives and Resources</i> . . . . .	91
Primary Succession . . . . .	92
Secondary Succession . . . . .	93
Wetland Succession . . . . .	95
Conservation and Succession . . . . .	96

### THE GENETICS OF POPULATIONS

<i>Objectives and Resources</i> . . . . .	97
Alleles . . . . .	99
Genes, Inheritance and Selection . . . . .	100
Monohybrid Cross . . . . .	101
The Test Cross . . . . .	102
Dominance of Alleles . . . . .	103
Multiple Alleles in Blood Groups . . . . .	105
Sex Linkage . . . . .	107
Gene Pools and Evolution . . . . .	109
Hardy-Weinberg Calculations . . . . .	111
Analysis of a Squirrel Gene Pool . . . . .	113
Natural Selection . . . . .	115
Heterozygous Advantage . . . . .	117
Selection for Human Birth Weight . . . . .	118
Industrial Melanism . . . . .	119
Adaptations and Fitness . . . . .	121
Isolation and Species Formation . . . . .	122
Reproductive Isolation . . . . .	123
Allopatric Speciation . . . . .	125

### UNIT 5: CONTROL IN CELLS AND ORGANISMS

Concept Map for Unit 5 . . . . . 127

### RESPONSES AND COORDINATION

<i>Objectives and Resources</i> . . . . .	128
Detecting Changing States . . . . .	130
Taxes and Kineses . . . . .	131
Plant Responses . . . . .	132
Tropisms and Growth Responses . . . . .	133
Transport and Effects of Auxin . . . . .	134
Investigating Phototropism . . . . .	135
Investigating Gravitropism . . . . .	136
Hormonal Regulatory Systems . . . . .	137
Cell Signalling . . . . .	138
Nervous Regulatory Systems . . . . .	139
Reflexes . . . . .	140
The Autonomic Nervous System . . . . .	141
Control of Heart Rate . . . . .	143
The Basis of Sensory Perception . . . . .	145
The Structure of the Eye . . . . .	146
The Physiology of Vision . . . . .	147
Neurone Structure and Function . . . . .	149
Action Potentials . . . . .	151
Cholinergic Synapses . . . . .	153
Integration at Synapses . . . . .	154
Drugs at Synapses . . . . .	155

### MUSCLES AND MOVEMENT

<i>Objectives and Resources</i> . . . . .	156
Muscle Structure and Function . . . . .	157
The Sliding Filament Theory . . . . .	159
The Mechanics of Movement . . . . .	160
Energy for Muscle Contraction . . . . .	161
Muscle Tone and Posture . . . . .	163
Muscle Fatigue . . . . .	164
Muscle Physiology and Performance . . . . .	165

### HOMEOSTASIS

<i>Objectives and Resources</i> . . . . .	166
Principles of Homeostasis . . . . .	167
Maintaining Homeostasis . . . . .	169
Control of Body Temperature . . . . .	171
Mechanisms of Thermoregulation . . . . .	173
Thermoregulation in Humans . . . . .	175
Second Messenger Systems . . . . .	176
Control of Blood Glucose . . . . .	177
Diabetes Mellitus . . . . .	179
The Oestrous Cycle . . . . .	181
Control of the Oestrous Cycle . . . . .	182

### DNA AND GENE EXPRESSION

<i>Objectives and Resources</i> . . . . .	184
The Genetic Code . . . . .	185
Transcription . . . . .	186
Gene Expression . . . . .	187
Translation . . . . .	189
Protein Synthesis Summary . . . . .	190
The Effect of Mutations . . . . .	192
For Harm or Benefit? . . . . .	193
The Genetic Origins of Cancer . . . . .	194
Oestrogen, Transcription, and Cancer . . . . .	195
Herceptin: A Modern Monoclonal . . . . .	196
Gene Mutations . . . . .	197
Inherited Metabolic Disorders . . . . .	199
Sickle Cell Mutation . . . . .	200
Cystic Fibrosis Mutation . . . . .	201
Point Mutation Problems . . . . .	202
Gene Control in Eukaryotes . . . . .	203
Stem Cells . . . . .	204
Stem Cell Therapy . . . . .	205
Plant Tissue Culture . . . . .	207

### GENE CLONING TECHNOLOGIES

<i>Objectives and Resources</i> . . . . .	209
What is Genetic Modification? . . . . .	211
Applications of GMOs . . . . .	212
Restriction Enzymes . . . . .	213
Ligation . . . . .	215
Gel Electrophoresis . . . . .	216
Interpreting Electrophoresis Gels . . . . .	217
Preparing a Gene for Cloning . . . . .	218
In Vitro Gene Cloning . . . . .	219
In Vivo Gene Cloning . . . . .	221
Vectors in Transgenesis . . . . .	223
Human Proteins from GE Bacteria . . . . .	225
Chymosin . . . . .	227
Golden Rice . . . . .	228
Ethics of GMO Technology . . . . .	229
Gene Therapy . . . . .	231
Vectors for Gene Therapy . . . . .	232
Gene Delivery Systems . . . . .	233
DNA Chips . . . . .	235
Automated DNA Sequencing . . . . .	237
Genome Analysis . . . . .	239
The Human Genome Project . . . . .	241
Investigating Genetic Biodiversity . . . . .	243
DNA Profiling using PCR . . . . .	245
Forensic Applications of DNA Profiling . . . . .	247
Genetic Counselling . . . . .	248

INDEX . . . . . 249
