

# OCR Biology AS & A2 Series

## Features

- **Student Workbooks:** Specifically written to meet the requirements of students studying the OCR Biology course. They provide **unit-based** content within **five broad modules**.
- **AS and A2 Model Answers books:** Contain suggested answers to **all** activities.
- **Teacher Resource CD-ROM** contains:
  - Full digital copies of the AS and A2 Student Workbooks and Model Answers books as **non-printable** PDF files.
  - **Crossword puzzles** and **glossary worksheets** to test understanding of biological terms for all topics.
  - Presentation Media **free** sample: **Mutations version 2.0**.
  - Microsoft® Excel® spreadsheets for statistical analysis.

**NOTE:** New editions of each workbook are published in **August** of each alternate year.

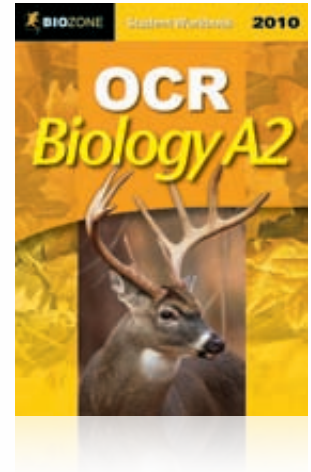

Release date: August 2009

**OCR Biology AS**

- Introduction
- Skills in Biology
- Cell Structure
- Cell Membranes and Transport
- Cell Division
- Gas Exchange in Animals
- Animal Transport Systems
- Biological Molecules
- The Genetic Code
- Food and Health
- Defence and the Immune System
- Human Disease
- Classification
- Biodiversity and Conservation
- Evolution
- Ecological Principles

Pages: 344

**OCR Biology A2**

- Communication and Homeostasis
- Nerves
- Hormones and Control
- Excretion
- Photosynthesis
- Respiration
- Cellular Control
- Meiosis and Variation
- Variation and Population Change
- Cloning and Biotechnology
- Genomes and Gene Technologies
- Ecosystems
- Populations and Sustainability
- Plant Responses
- Animal Responses
- Animal Behaviour

Pages: 282

## Ordering information

### AS Student Workbook - 2009

ISBN: 978-1-877462-16-0

Full Price: £16.95  
Discount Price\*: £10.95

### A2 Student Workbook - 2010

ISBN: 978-1-877462-38-2

Full Price: £16.95  
Discount Price\*: £10.95

### AS Model Answers

ISBN: 978-1-877462-17-7 £3.95

### A2 Model Answers

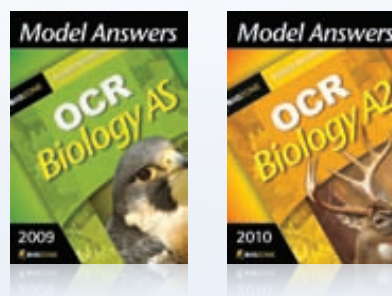

ISBN: 978-1-877462-40-5 £3.95

### Teacher Resource CD-ROM

ISBN: 978-1-877462-43-6 £29.95

\* Discount Price: Available to schools ordering directly from the Biozone sales office. A minimum of 5 books must be ordered to qualify. Ownership of the books must reside with the students.

## SKILLS IN BIOLOGY

|  |    |
|--|----|
| <i>Objectives and Resources</i> . . . . .      | 13 |
| Hypotheses and Predictions . . . . .           | 15 |
| Planning an Investigation . . . . .            | 17 |
| Experimental Method . . . . .                  | 19 |
| Recording Results . . . . .                    | 21 |
| Variables and Data . . . . .                   | 22 |
| Transforming Raw Data . . . . .                | 23 |
| Terms and Notation . . . . .                   | 25 |
| Data Presentation . . . . .                    | 26 |
| Drawing Bar Graphs . . . . .                   | 27 |
| Drawing Histograms . . . . .                   | 28 |
| Drawing Pie Graphs . . . . .                   | 29 |
| Drawing Kite Graphs . . . . .                  | 30 |
| Drawing Line Graphs . . . . .                  | 31 |
| Interpreting Line and Scatter Graphs . . . . . | 34 |
| Drawing Scatter Plots . . . . .                | 35 |
| Taking the Next Step . . . . .                 | 36 |
| The Student's t Test . . . . .                 | 38 |
| Student's t Test Exercise . . . . .            | 39 |
| Using Chi-Squared in Ecology . . . . .         | 41 |
| Using Chi-Squared in Genetics . . . . .        | 42 |
| Descriptive Statistics . . . . .               | 43 |
| The Reliability of the Mean . . . . .          | 45 |
| Biological Drawings . . . . .                  | 47 |
| The Structure of a Report . . . . .            | 49 |
| Writing the Methods . . . . .                  | 50 |
| Writing Your Results . . . . .                 | 51 |
| Writing Your Discussion . . . . .              | 52 |
| Citing and Listing References . . . . .        | 53 |
| Report Checklist . . . . .                     | 55 |

## CELL STRUCTURE

|  |    |
|--|----|
| <i>Objectives and Resources</i> . . . . .      | 56 |
| The Cell Theory . . . . .                      | 57 |
| Characteristics of Life . . . . .              | 58 |
| Types of Living Things . . . . .               | 59 |
| Types of Cells . . . . .                       | 60 |
| Cell Sizes . . . . .                           | 61 |
| Plant Cells . . . . .                          | 62 |
| Animal Cells . . . . .                         | 63 |
| Cell Structures and Organelles . . . . .       | 64 |
| Differential Centrifugation . . . . .          | 67 |
| Unicellular Eukaryotes . . . . .               | 68 |
| Prokaryotic Cells . . . . .                    | 69 |
| Production and Secretion of Proteins . . . . . | 71 |
| Optical Microscopes . . . . .                  | 73 |
| Electron Microscopes . . . . .                 | 75 |
| Interpreting Electron Micrographs . . . . .    | 77 |

## CELL MEMBRANES AND TRANSPORT

|   |    |
|---|----|
| <i>Objectives and Resources</i> . . . . . | 79 |
| The Role of Membranes in Cells . . . . .  | 80 |
| The Structure of Membranes . . . . .      | 81 |
| Cell Signalling and Receptors . . . . .   | 83 |
| Diffusion . . . . .                       | 84 |
| Osmosis and Water Potential . . . . .     | 85 |
| Surface Area and Volume . . . . .         | 87 |
| Ion Pumps . . . . .                       | 89 |
| Exocytosis and Endocytosis . . . . .      | 90 |
| Active and Passive Transport . . . . .    | 91 |

## CELL DIVISION

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . . | 92  |
| Cell Division . . . . .                   | 93  |
| Mitosis and the Cell Cycle . . . . .      | 94  |
| The Genetic Origins of Cancer . . . . .   | 96  |
| Cell Growth and Cancer . . . . .          | 97  |
| Stem Cells . . . . .                      | 98  |
| Differentiation of Human Cells . . . . .  | 99  |
| Human Cell Specialisation . . . . .       | 101 |
| Plant Cell Specialisation . . . . .       | 102 |
| Root Cell Development . . . . .           | 103 |
| Levels of Organisation . . . . .          | 104 |
| Animal Tissues . . . . .                  | 105 |
| Plant Tissues . . . . .                   | 106 |

## GAS EXCHANGE IN ANIMALS

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . . | 107 |
| Introduction to Gas Exchange . . . . .    | 108 |
| Gas Exchange in Animals . . . . .         | 109 |
| The Human Respiratory System . . . . .    | 111 |
| Breathing in Humans . . . . .             | 113 |
| Control of Breathing . . . . .            | 115 |
| Review of Lung Function . . . . .         | 116 |
| Respiratory Pigments . . . . .            | 117 |

## ANIMAL TRANSPORT SYSTEMS

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . . | 118 |
| Internal Transport . . . . .              | 119 |
| Mammalian Transport . . . . .             | 120 |
| Circulatory Systems . . . . .             | 121 |
| Arteries . . . . .                        | 123 |
| Veins . . . . .                           | 124 |
| Capillaries and Tissue Fluid . . . . .    | 125 |
| The Effects of High Altitude . . . . .    | 127 |
| Exercise and Blood Flow . . . . .         | 128 |
| Blood . . . . .                           | 129 |
| Gas Transport in Humans . . . . .         | 131 |
| The Human Heart . . . . .                 | 133 |
| Control of Heart Activity . . . . .       | 135 |
| The Cardiac Cycle . . . . .               | 137 |
| Review of the Human Heart . . . . .       | 138 |

## PLANT TRANSPORT SYSTEMS

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . . | 139 |
| Transport in Plants . . . . .             | 140 |
| Stems and Roots . . . . .                 | 141 |
| Leaf Structure . . . . .                  | 143 |
| Xylem . . . . .                           | 144 |
| Phloem . . . . .                          | 145 |
| Uptake at the Root . . . . .              | 146 |
| Transpiration . . . . .                   | 147 |
| Adaptations of Xerophytes . . . . .       | 149 |
| Translocation . . . . .                   | 151 |

## BIOLOGICAL MOLECULES

|  |     |
|--|-----|
| <i>Objectives and Resources</i> . . . . .    | 153 |
| The Biochemical Nature of the Cell . . . . . | 155 |
| Organic Molecules . . . . .                  | 156 |
| Biochemical Tests . . . . .                  | 157 |
| Water and Inorganic Ions . . . . .           | 158 |
| Carbohydrates . . . . .                      | 159 |
| Lipids . . . . .                             | 161 |
| Amino Acids . . . . .                        | 163 |
| Proteins . . . . .                           | 165 |
| Enzymes . . . . .                            | 167 |
| Enzyme Reaction Rates . . . . .              | 169 |
| Enzyme Cofactors and Inhibitors . . . . .    | 170 |

## THE GENETIC CODE

|  |     |
|--|-----|
| <i>Objectives and Resources</i> . . . . .      | 171 |
| DNA Molecules . . . . .                        | 172 |
| Eukaryote Chromosome Structure . . . . .       | 173 |
| Nucleic Acids . . . . .                        | 175 |
| Creating a DNA Model . . . . .                 | 177 |
| DNA Replication . . . . .                      | 181 |
| Review of DNA Replication . . . . .            | 183 |
| The Genetic Code . . . . .                     | 184 |
| The Simplest Case: Genes to Proteins . . . . . | 185 |
| Analysing a DNA Sample . . . . .               | 186 |
| Transcription . . . . .                        | 187 |
| Translation . . . . .                          | 188 |
| Review of Gene Expression . . . . .            | 189 |

## FOOD AND HEALTH

|  |     |
|--|-----|
| <i>Objectives and Resources</i> . . . . .    | 191 |
| Global Human Nutrition . . . . .             | 192 |
| A Balanced Diet . . . . .                    | 193 |
| Deficiency Diseases . . . . .                | 195 |
| Malnutrition and Obesity . . . . .           | 197 |
| Cardiovascular Disease . . . . .             | 199 |
| The Green Revolution . . . . .               | 201 |
| Selective Breeding in Crop Plants . . . . .  | 203 |
| Selective Breeding in Animals . . . . .      | 205 |
| Producing Food with Microorganisms . . . . . | 207 |
| Increasing Food Production . . . . .         | 209 |
| Food Preservation . . . . .                  | 211 |

## DEFENCE AND THE IMMUNE SYSTEM

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . . | 212 |
| Targets for Defence . . . . .             | 214 |
| Blood Group Antigens . . . . .            | 215 |
| Blood Clotting and Defence . . . . .      | 216 |
| The Body's Defences . . . . .             | 217 |
| The Action of Phagocytes . . . . .        | 219 |
| Inflammation . . . . .                    | 220 |
| Fever . . . . .                           | 221 |
| The Lymphatic System . . . . .            | 222 |
| The Immune System . . . . .               | 223 |
| Antibodies . . . . .                      | 225 |
| Acquired Immunity . . . . .               | 227 |
| New Medicines . . . . .                   | 228 |
| Vaccination . . . . .                     | 229 |
| Types of Vaccine . . . . .                | 231 |

## HUMAN DISEASE

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . . | 233 |
| Health vs Disease . . . . .               | 235 |
| Infection and Disease . . . . .           | 236 |
| Transmission of Disease . . . . .         | 237 |
| Bacterial Diseases . . . . .              | 238 |
| Tuberculosis . . . . .                    | 239 |
| Foodborne Disease . . . . .               | 240 |
| Cholera . . . . .                         | 241 |
| Protozoan Diseases . . . . .              | 242 |
| Malaria . . . . .                         | 243 |
| Resistance in Pathogens . . . . .         | 244 |
| Viral Diseases . . . . .                  | 245 |
| HIV and AIDS . . . . .                    | 247 |
| Epidemiology of AIDS . . . . .            | 249 |
| Replication in Animal Viruses . . . . .   | 251 |
| Emerging Diseases . . . . .               | 253 |
| The Control of Disease . . . . .          | 255 |
| Antimicrobial Drugs . . . . .             | 257 |
| Diseases Caused by Smoking . . . . .      | 259 |

## CLASSIFICATION

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . .   | 261 |
| The New Tree of Life . . . . .              | 262 |
| New Classification Schemes . . . . .        | 263 |
| Features of Taxonomic Groups . . . . .      | 264 |
| Classification System . . . . .             | 269 |
| Features of the Five Kingdoms . . . . .     | 271 |
| Features of Microbial Groups . . . . .      | 272 |
| Features of Animal Taxa . . . . .           | 273 |
| Features of Macrofungi and Plants . . . . . | 275 |
| The Classification of Life . . . . .        | 276 |
| Classification Keys . . . . .               | 282 |
| Keying out Plant Species . . . . .          | 284 |

## BIODIVERSITY AND CONSERVATION

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . .   | 285 |
| Global Biodiversity . . . . .               | 286 |
| Britain's Biodiversity . . . . .            | 287 |
| Loss of Biodiversity . . . . .              | 289 |
| Tropical Deforestation . . . . .            | 290 |
| Biodiversity and Global Warming . . . . .   | 291 |
| Grasslands Management . . . . .             | 292 |
| The Impact of Farming . . . . .             | 293 |
| Biodiversity and Conservation . . . . .     | 295 |
| National Conservation . . . . .             | 297 |
| Measuring Diversity in Ecosystems . . . . . | 299 |
| CITES and Conservation . . . . .            | 301 |

## EVOLUTION

|  |     |
|--|-----|
| <i>Objectives and Resources</i> . . . . .  | 302 |
| The Modern Theory of Evolution . . . . .   | 303 |
| The Species Concept . . . . .              | 304 |
| Variation . . . . .                        | 305 |
| Adaptations and Fitness . . . . .          | 307 |
| Darwin's Theory . . . . .                  | 309 |
| Natural Selection . . . . .                | 310 |
| Selection for Human Birth Weight . . . . . | 311 |
| Stages in Species Development . . . . .    | 312 |
| Fossil Formation . . . . .                 | 313 |
| The Fossil Record . . . . .                | 315 |
| Dating a Fossil site . . . . .             | 317 |
| Darwin's Finches . . . . .                 | 319 |
| DNA Hybridisation . . . . .                | 320 |
| Immunological Studies . . . . .            | 321 |
| Other Evidence for Evolution . . . . .     | 322 |
| Homologous Structures . . . . .            | 323 |
| Vestigial Organs . . . . .                 | 324 |
| Antibiotic Resistance . . . . .            | 325 |
| Insecticide Resistance . . . . .           | 326 |

## ECOLOGICAL PRINCIPLES

|   |     |
|---|-----|
| <i>Objectives and Resources</i> . . . . . | 327 |
| Components of an Ecosystem . . . . .      | 328 |
| Habitat . . . . .                         | 329 |
| Ecological Niche . . . . .                | 330 |
| Food Chains and Webs . . . . .            | 331 |
| Energy Inputs and Outputs . . . . .       | 333 |
| Energy Flow in an Ecosystem . . . . .     | 334 |
| The Nitrogen Cycle . . . . .              | 336 |

|                 |     |

# OCR Biology A2 - Contents

|                                       |     |
|---------------------------------------|-----|
| Note to the Teacher & Acknowledgments | iii |
| How To Use This Workbook              | 1   |
| Activity Pages                        | 2   |
| Explanation of Terms                  | 3   |
| Resources Information                 | 4   |
| Textbook Reference Grid               | 7   |
| Using the Internet                    | 8   |
| Using the Teacher Resource CD-ROM     | 10  |

## COURSE GUIDES:

|                       |    |
|-----------------------|----|
| OCR AS and A2 Biology | 11 |
| CIE AS and A2 Biology | 12 |

## COMMUNICATION AND HOMEOSTASIS

|                                 |    |
|---------------------------------|----|
| <i>Objectives and Resources</i> | 13 |
| Detecting Changing States       | 14 |
| Cell Signalling                 | 15 |
| Principles of Homeostasis       | 16 |
| Maintaining Homeostasis         | 17 |
| Nervous Regulatory Systems      | 19 |
| Hormonal Regulatory Systems     | 20 |
| Control of Body Temperature     | 21 |
| Mechanisms of Thermoregulation  | 23 |
| Thermoregulation in Humans      | 25 |

## NERVES

|                                 |    |
|---------------------------------|----|
| <i>Objectives and Resources</i> | 26 |
| Neurone Structure and Function  | 27 |
| Action Potentials               | 29 |
| The Cholinergic Synapse         | 31 |
| Integration at Synapses         | 32 |
| The Basis of Sensory Perception | 33 |

## HORMONES AND CONTROL

|                                 |    |
|---------------------------------|----|
| <i>Objectives and Resources</i> | 34 |
| The Endocrine System            | 35 |
| Signal Transduction             | 37 |
| Pancreatic Histology            | 38 |
| Control of Blood Glucose        | 39 |
| Diabetes Mellitus               | 41 |
| Control of Heart Rate           | 43 |

## EXCRETION

|                                 |    |
|---------------------------------|----|
| <i>Objectives and Resources</i> | 45 |
| Waste Products in Humans        | 46 |
| The Liver's Homeostatic Role    | 47 |
| The Urinary System              | 49 |
| Urine Analysis                  | 50 |
| The Physiology of the Kidney    | 51 |
| Control of Urine Output         | 53 |
| Kidney Transplants              | 54 |
| Renal Dialysis                  | 55 |

## PHOTOSYNTHESIS

|                                    |    |
|------------------------------------|----|
| <i>Objectives and Resources</i>    | 56 |
| Plants as Producers                | 57 |
| Leaf Structure                     | 58 |
| Photosynthesis                     | 59 |
| Pigments and Light Absorption      | 60 |
| The Biochemistry of Photosynthesis | 61 |
| Factors Affecting Photosynthesis   | 63 |

## RESPIRATION

|                                 |    |
|---------------------------------|----|
| <i>Objectives and Resources</i> | 64 |
| ATP in Metabolism               | 65 |
| The Role of ATP in Cells        | 66 |
| Cellular Respiration            | 67 |

|                                 |    |
|---------------------------------|----|
| Measuring Respiration           | 68 |
| The Biochemistry of Respiration | 69 |
| Anaerobic Pathways              | 71 |

## CELLULAR CONTROL

|                                      |    |
|--------------------------------------|----|
| <i>Objectives and Resources</i>      | 72 |
| The Genetic Code                     | 73 |
| The Simplest Case: Genes to Proteins | 74 |
| Transcription                        | 75 |
| Translation                          | 76 |
| Protein Synthesis Summary            | 77 |
| The Effect of Mutations              | 79 |
| For Harm or Benefit?                 | 80 |
| Gene Mutations                       | 81 |
| Inherited Metabolic Disorders        | 83 |
| Sickle Cell Mutation                 | 84 |
| Cystic Fibrosis Mutation             | 85 |
| Point Mutation Problems              | 86 |
| Gene Control in Prokaryotes          | 87 |
| Genes and Development                | 89 |
| Apoptosis: Programmed Cell Death     | 91 |

## MEIOSIS AND VARIATION

|                                  |     |
|----------------------------------|-----|
| <i>Objectives and Resources</i>  | 92  |
| Alleles                          | 94  |
| Sources of Variation             | 95  |
| Mitosis vs Meiosis               | 96  |
| Meiosis                          | 97  |
| Crossing Over                    | 99  |
| Crossing Over Problems           | 100 |
| Linkage                          | 101 |
| Recombination                    | 102 |
| The Test Cross                   | 103 |
| Monohybrid Cross                 | 104 |
| Dihybrid Cross                   | 105 |
| Dominance of Alleles             | 107 |
| Multiple Alleles in Blood Groups | 109 |
| Sex Linkage                      | 111 |
| Inheritance Patterns             | 113 |
| Interactions Between Genes       | 114 |
| Collaboration                    | 115 |
| Complementary Genes              | 116 |
| Epistasis                        | 117 |
| Polygenes                        | 119 |
| Gene-Environment Interactions    | 121 |
| Inheritance in Domestic Cats     | 123 |
| What Genotype has that Cat?      | 125 |
| Chi-Squared Test in Genetics     | 126 |
| Using Chi-Squared in Genetics    | 127 |

## VARIATION AND POPULATION CHANGE

|                                  |     |
|----------------------------------|-----|
| <i>Objectives and Resources</i>  | 128 |
| Gene Pools and Evolution         | 129 |
| Hardy-Weinberg Calculations      | 131 |
| Analysis of a Squirrel Gene Pool | 133 |
| Natural Selection                | 135 |
| Sexual selection                 | 137 |
| Heterozygous Advantage           | 138 |
| Industrial Melanism              | 139 |
| The Founder Effect               | 141 |
| Population Bottlenecks           | 142 |
| Genetic Drift                    | 143 |
| Isolating Mechanisms             | 144 |
| Reproductive Isolation           | 145 |
| Species and Phylogeny            | 147 |
| Species and Artificial Selection | 148 |

## CLONING AND BIOTECHNOLOGY

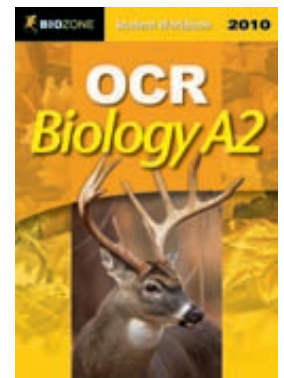

|                                  |     |
|----------------------------------|-----|
| <i>Objectives and Resources</i>  | 149 |
| What is Cloning?                 | 150 |
| Natural Clones in Plants         | 151 |
| Plant Tissue Culture             | 153 |
| Cloning by Nuclear Transfer      | 155 |
| Cloning by Embryo Splitting      | 157 |
| What is Biotechnology?           | 158 |
| Microbes and Biotechnology       | 159 |
| Microbial Growth and Metabolites | 161 |
| The Basis of Resistance          | 163 |
| Environmental Uses of Microbes   | 164 |
| Industrial Production of Enzymes | 165 |
| Putting Enzymes to Use           | 166 |
| Applications of Enzymes          | 167 |
| Monoclonal Antibodies            | 169 |
| Herceptin: A Modern Monoclonal   | 171 |

## GENOMES AND GENE TECHNOLOGIES

|                                    |     |
|------------------------------------|-----|
| <i>Objectives and Resources</i>    | 172 |
| What is Genetic Modification?      | 174 |
| Restriction Enzymes                | 175 |
| Ligation                           | 177 |
| Gel Electrophoresis                | 178 |
| Polymerase Chain Reaction          | 179 |
| DNA Profiling using PCR            | 181 |
| DNA Chips                          | 183 |
| Gene Cloning Using Plasmids        | 185 |
| Vectors in Transgenesis            | 187 |
| Production of Human Proteins       | 189 |
| Golden Rice                        | 191 |
| GE and Xenotransplantation         | 192 |
| Gene Therapy                       | 193 |
| Vectors for Gene Therapy           | 194 |
| Gene Delivery Systems              | 195 |
| Ethics of GMO Technology           | 197 |
| Automated DNA Sequencing           | 199 |
| Genome Analysis                    | 201 |
| Investigating Genetic Biodiversity | 203 |
| The Human Genome Project           | 205 |
| Genome Projects                    | 207 |
| Genetic Counselling                | 208 |

## ECOSYSTEMS

|                                   |     |
|-----------------------------------|-----|
| <i>Objectives and Resources</i>   | 209 |
| Components of an Ecosystem        | 210 |
| Energy Inputs and Outputs         | 211 |
| Food Chains                       | 212 |
| Constructing a Food Web           | 213 |
| Energy Flow in an Ecosystem       | 215 |
| Ecological Pyramids               | 217 |
| Ecological Succession             | 219 |
| Quadrat Sampling                  | 221 |
| Quadrat-Based Estimates           | 222 |
| Sampling a Leaf Litter Population | 223 |
| Transect Sampling                 | 225 |
| The Nitrogen Cycle                | 227 |

## POPULATIONS AND SUSTAINABILITY

|                                 |     |
|---------------------------------|-----|
| <i>Objectives and Resources</i> | 229 |
| Features of Populations         | 230 |
| Density and Distribution        | 231 |
| Population Regulation           | 232 |
| Population Growth               | 233 |
| Population Growth Curves        | 234 |
| Species Interactions            | 235 |
| Intraspecific Competition       | 237 |
| Interspecific Competition       | 239 |
| Niche Differentiation           | 241 |
| Predator-Prey Interactions      | 242 |
| Predator-Prey Strategies        | 243 |
| Conservation and Sustainability | 245 |
| Ecotourism                      | 246 |
| Sustainable Forestry            | 247 |

## PLANT RESPONSES

|                                    |     |
|------------------------------------|-----|
| <i>Objectives and Resources</i>    | 248 |
| Plant Responses                    | 249 |
| Tropisms and Growth Responses      | 250 |
| Investigating Phototropism         | 251 |
| Investigating Gravitropism         | 252 |
| Responses to Temperature in Plants | 253 |
| Auxins, Gibberellins, and ABA      | 254 |
| Photoperiodism in Plants           | 255 |
| Plant Hormones and Applications    | 257 |

## ANIMAL RESPONSES

|                                 |     |
|---------------------------------|-----|
| <i>Objectives and Resources</i> | 259 |
| The Mammalian Nervous System    | 260 |
| The Autonomic Nervous System    | 261 |
| The Human Brain                 | 263 |
| The Mechanics of Movement       | 265 |
| Muscle Structure and Function   | 267 |
| Energy and Exercise             | 269 |
| The Sliding Filament Model      | 271 |
| Fight or Flight                 | 272 |

## ANIMAL BEHAVIOUR

|                                 |     |
|---------------------------------|-----|
| <i>Objectives and Resources</i> | 273 |
| The Components of Behaviour     | 274 |
| Simple Behaviours               | 275 |
| Primate Behaviour               | 276 |
| Learned Behaviour               | 277 |
| Learning to Sing                | 279 |
| Insight Behaviour               | 280 |
| Dopamine and Behaviour          | 281 |

|       |     |

# Sample pages - Workbook

## 1 Course Objectives keyed-in:

The learning objectives are written for each specific course unit. They provide students with a planning tool for completion of work within that unit.

## 2 Introduction to the topic:

Students are provided with a concise introduction to the concepts in the activity. The focus of the activity is outlined in the first paragraph.

## 3 Easy to understand diagrams:

A highly visual presentation makes it easier to understand difficult concepts. Clear annotated diagrams make information accessible.

## 4 Consolidation and branching out:

The write-on format of each activity provides opportunity to consolidate knowledge, while allowing scope for exploring new ideas. **Differential instruction** becomes easier and students at all levels are encouraged to be critical thinkers.

# Teacher Resource CD-ROM

- Full digital copies of the AS and A2 Student Workbooks and Model Answers books as **non-printable** PDF files.
- Printable additional** activities. These are PDF files with a **one year photocopy licence**.
- Crossword puzzles** and **glossary worksheets** to test understanding of biological terms for all topics.
- Presentation Media **free** sample: **Mutations version 2.0**.
- Microsoft® Excel® spreadsheets for statistical analysis.
